PROFESSIONAL SUMMARY

Solution Architect and Technical Lead with 16 years across Azure, GCP and AWS — currently pivoting from Cloud/DevOps engineering into AI Engineering. Architect of hybrid-cloud platforms running at 99.9% uptime, accelerator of Infrastructure-as-Code delivery by 30% through AI-assisted automation, and integrator of Generative AI workflows (Azure AI Foundry, Azure AI Search, GPT-on-Apigee gateways, sentiment-analysis agents) into enterprise environments. Trusted by customers for pre-sales architecture, DevSecOps governance, and platform reliability at scale.

CORE SKILLS

- **Cloud Platforms:** Microsoft Azure (4/5), Google Cloud Platform (GCP), Amazon Web Services (AWS), hybrid-cloud & multi-cloud operations.
- **AI & Generative AI:** Large Language Models (LLMs), Generative AI (GenAI), Retrieval-Augmented Generation (RAG), AI Agents, Model Context Protocol (MCP), prompt context & guardrail design, Azure AI Foundry, Azure AI Search, vector knowledge bases, GPT model deployment.
- **Containers & Orchestration:** Kubernetes (containerized workloads, manifest authoring, troubleshooting), Docker, container lifecycle management.
- **Infrastructure as Code (IaC):** Terraform, Azure Resource Manager (ARM) templates, Ansible, configuration management.
- **DevOps & CI/CD:** Azure DevOps pipelines, CI/CD design, GitHub, GitHub Copilot pair-programming, JFrog Artifactory, release automation.
- **DevSecOps & Security:** SonarQube, Mend, AquaSec, Checkmarx, SCA, vulnerability remediation, security compliance, pipeline hardening.
- **API Platform:** Google Apigee (Edge) — proxy design, rate limiting, load balancing, REST API gateway extension via Node.js/Python utilities.
- **Programming & Scripting:** Python, Node.js, PowerShell, Shell/Bash, automation utilities.
- **Observability & SRE:** Prometheus, Grafana (foundational), reliability engineering practices, incident response.
- **Leadership:** Pre-sales solution proposals, technical leadership, talent operations, customer architecture reviews, knowledge sharing (LinkedIn, Medium).

CERTIFICATIONS

- **Microsoft Certified: Azure AI Engineer Associate (AI-102)** — in progress, target 2026. Focus: Azure AI Foundry, Azure AI Search, responsible AI.
- **Google Cloud — Generative AI** — completed. Generative AI fundamentals on Google Cloud.
- **Certified Kubernetes Administrator (CKA)** — CNCF / Linux Foundation. Previously certified; hands-on Kubernetes administration skills retained.

PROFESSIONAL EXPERIENCE

Globant India Pvt. Ltd. · India

May 2019 – Present

Solution Architect & Technical Lead — Cloud, DevOps & AI

- Govern the full lifecycle (provisioning, scaling, decommissioning) of mission-critical infrastructure across hybrid Azure and GCP environments, sustaining 99.9% uptime for client-facing APIs.

- Accelerated Infrastructure-as-Code (IaC) delivery by 30% by introducing GitHub Copilot as a pair-programmer across Ansible playbooks, Python and Node.js automation libraries.
- Designed and deployed Large Language Model (LLM) integrations: GPT models served behind Google Apigee proxies for rate limiting and load balancing, with engineered prompt context and guardrails that reduced token consumption and hallucinations on customer codebases.
- Built and shipped a sentiment-analysis AI Agent inside Globant's Enterprise AI tool, classifying free-form feedback and routing it to the right squad.
- Prototyped Retrieval-Augmented Generation (RAG) applications on Azure AI Foundry and Azure AI Search to build searchable knowledge bases over enterprise document sets.
- Engineered high-performance Node.js and Python utilities that extended the Apigee Edge platform with custom administration tooling and automated repetitive operational asks.
- Embedded DevSecOps scanning (Mend, SonarQube, AquaSec, Checkmarx) into Azure DevOps CI/CD pipelines and led vulnerability remediation across infrastructure and application code.
- Operate as the customer-facing technical lead: pre-sales architecture proposals, solution design reviews, and studio-level talent operations including hiring and capability planning.
- Practitioner of AI-assisted engineering with GitHub Copilot, Factory (droid) and Claude; share learnings on LinkedIn and Medium.

Cognizant Technology Solutions · India

May 2016 – May 2019

AWS Cloud Engineer

- Designed, provisioned and operated AWS infrastructure for enterprise customers, including compute, storage, networking and IAM configurations across multiple workloads.
- Supported cloud migration and modernization engagements — taking legacy on-premises workloads to AWS with a focus on cost, security and reliability.
- Automated routine cloud operations using Python and Shell scripting, reducing manual toil for the operations team.

Tata Consultancy Services · India

Sep 2014 – Mar 2016

AWS Cloud Administrator / Unix Administrator

- Administered hybrid AWS and Unix workloads for regulated customer environments — provisioning, patching, monitoring and automating routine operations.
- Wrote Shell automation to streamline patching cycles and reduce change-window risk.

Cybage Software · India

Aug 2012 – Sep 2014

Production Support Engineer

- Owned 24x7 production support for revenue-critical services — incident triage, root cause analysis, and runbook hardening to prevent recurrence.
- Partnered with development teams on reliability improvements driven by production incident learnings.

SANPulse Technologies · India

Apr 2012 – Aug 2012

Unix Administrator

- Provided Unix systems administration and operational support during a short-term engagement.

Tech Mahindra · India

Nov 2009 – Apr 2012

Unix L1 Support Engineer

- First-line Unix support — handled incidents, server health checks and basic administration tasks. The role where I learned that reproducibility is everything.

EDUCATION

Bachelor of Science (B.Sc.) — Information Technology

2005 – 2008
